GameplayKit Noise Explorer

A UIKit playground interactions demo

Requirements

This is a Swift 3 Playground that runs on either:

- An iPad running iOS 10
- A Mac running Xcode 8 (runs on either OS X El Capitan or MacOS Sierra)

UIKit in Playgrounds

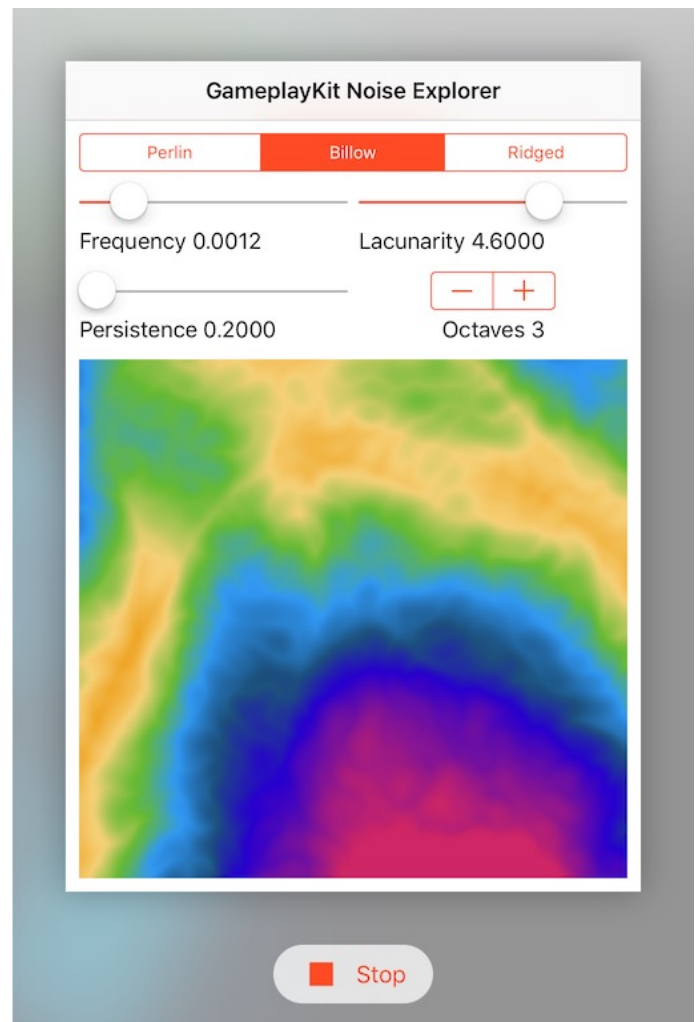

Since Xcode 7.3 (and now, with the Swift Playgrounds App on the iPad in iOS 10), Swift Playgrounds have been able to receive user interactions. This playground handles touch events and gestures with a subclass of UIView.

Noise Generation with GameplayKit in iOS 10

In iOS 10 GameplayKit gains a series of noise generation classes. This **Noise Explorer** playground allows you to experiment with different settings for the 3 Perlin-derived noise classes, Perlin, Billow, and Ridged (nb GameplayKit also includes other types of noise, not featured here, such as Voronoi).

Instructions for Noise Explorer

- Choose a noise generator and experiment with the settings. All the settings don't have an effect
